Updating the firmware on your unit

IMPORTANT:

- DO NOT perform this firmware update if the model number of your Pioneer product is anything other than one of the above models.
- Ensure that the update file is located within the root (top) folder of your USB storage device. There should be no other files within the USB storage device.
- While your unit is being updated, DO NOT turn off the system's power and DO NOT touch the unit's touchscreen as this may result in severe damage to your unit.
- DO NOT remove the USB storage device during the firmware update process.
- Performing the firmware update will restore all settings to their default values.
- Disconnect any external mobile devices that are currently connected to your unit.

Procedure:

1. Connect a blank (formatted) USB storage device to your computer, and then locate the correct update file and copy it onto the USB storage device.
2. Connect the USB storage device to the USB port.
3. Set the audio source to "OFF" on your unit.
4. Press the HOME button to display the menu screen.
5. Touch the following keys in the following order.

The "System" screen appears.

6. Scroll down the list and touch [System information].

7. Touch [Firmware Update].

The "Firmware Update" screen appears.

8. Touch [Continue] to display the data transfer mode.

9. Read the "WARNING," then touch the [Start] button to start the update process. If it shows "ERROR" on the display, try another USB device.

10. After starting, there will be a progress bar while updating. (Please note: version number will differ from image below.)

*The version of this picture is just reference.

11. Display will show "It succeeded..." when the update is complete.

12. The product will reboot after the update is finished. Do not touch anything even when the screen is blacked out. After it has finished rebooting, the screen will return to the menu screen.

13. The firmware update is now complete. Your Pioneer AV Receiver is now ready for use.
